RE: Confirmed Case of COVID-19 on Bus 35

Dear Parent/Guardian of Hanover School Division Bus 35

Manitoba Public Health has advised Hanover School Division that a confirmed case of COVID-19 was on the bus November 12 & 13th when the individual may have been infectious.

Hanover School Division is working closely with public health officials and following their recommendations.

Be assured that Public Health investigations to identify individuals who may have been exposed begin within 24 hours of a confirmed laboratory test.

Close contacts connected to the case have been identified and advised to self-isolate. Anyone who is a close contact has been contacted directly by public health. Bus 35 will remain available to all other students currently being transported on this Bus Route.

Please note: the school is not permitted to release the name or any identifying information about the confirmed case of COVID-19 to any member of the school, community or media.

If you have not been contacted by public health officials, your child(ren) have not been identified as being exposed to COVID-19 from this case. However, if your child develops a new onset or worsening of any one symptom listed in Column A or any two or more symptoms listed in Column B (see table below), even if they are mild, immediately isolate them from others. It is recommended your child get tested for COVID-19 as soon as symptoms appear. Call Health Links—Info Santé at 204-788-8200 or toll-free at 1-888-315-9257 for information on testing and isolation.

*Ensemble vers un avenir plus sain.
Together leading the way for a healthier tomorrow.*
