

Responsible AI Use in HSD

Show Your Learning

- Use AI to support your thinking, process, and growth.
- Be honest and ready to explain how you used AI and what you learned.

Respect Direction

- Follow your teacher's expectations for when, where, and how AI can be used.
- Use AI only in ways that support the skills and the learning being assessed.

Think Critically

- Question AI responses and check information carefully.
- Remember that AI can be wrong, incomplete, biased, or misleading.

Understand Your Role

- You are the learner, and AI is a tool to support your thinking — not replace it.
- Any connection AI seems to create is part of its design, not a real relationship.

Protect Your Privacy

- Use approved tools and follow safe-use instructions.
- Do not share personal information about yourself or others.
